MILLER® AIRCORE™ QUICK CONNECT

- Unique breathable, open-core padding technology provides optimal airflow and reduces heat and moisture build-up.
- Lightweight materials and components are selected to reduce fatigue for all-day endurance and increased productivity.
- Patented DuraFlex stretchable webbing provides greater flexibility, mobility and increased comfort.
- Contoured ergonomic padding design minimizes contact around a worker's neck, lower back and inner thighs to reduce chafing and irritation.

Breathable, Open-Core Padding
Technology for all-day comfort

MILLER® TITAN II™ HARNESS

The new economical Miller Titan™ II line of harnesses offers enhanced adjustability, improved comfort and increased worksite safety. This next generation of Titan harnesses from Honeywell Industrial Safety is an affordable fall protection solution for the general construction, manufacturing and oil and gas (refinery) markets.

- Easier vertical adjustability that stays in place, slip resistant back D-ring pad and forward positioned side D-rings, keeping your tool bags in the right place.
- More comfort and better fit with lighter, strategically-placed padding that provides optimal airflow.
- Increased worksite safety with vibrant Hi-Viz color webbing.
- ANSI Z359.11 compliance.

DBI/SALA EXOFIT™ CONSTRUCTION HARNESS

Construction vest-style harnesses are made for general construction work. These harnesses have excellent tool-carrying capability, a sewn-in hip pad and removable body belt. The original comfort fit harness, with a single piece of material that wraps around you in the shape of an X. It does without tangling and provides comfortable security. ExoFit remembers your adjustments. Snap three buckles and you're ready to work. Shoulder, hip and leg padding is built-in so it can't slip. A breathable lining guarantees you'll stay dry and comfortable. Vest-style harnesses are the most universal, with multiple configurations and connection point options. They're used across a wide variety of industries.

EXOFIT™

The Industry's First Comfort Harnesses

CONNECTING DEVICES: RETRACTABLES VS. LANYARDS

A **shock absorbing lanyard** allows for up to 6 feet of free-fall distance before activating plus another 3½ feet of stopping distance. In measuring the necessary clearance, OSHA regulations require an additional 6 feet for the worker's height, and a 3-foot safety clearance for a total **required clearance of approximately 18½ feet.**

Self-retracting lifelines begin to arrest a fall within 8 to 9 inches and the worker stops falling within 3½ feet. A total clearance of 6½ feet is required, making SRL's more suitable for working at a lower level. **SRL's should always be used when fall clearance is less than 18½ feet** to reduce the risk of hitting the ground or lower-level obstructions.

	GUARDIAN® MK PREMIUM EDGE RETRACTABLE LIFELINE	GUARDIAN® RETRACTABLE LANYARD – 11' NYLON WEB	CAPITAL SAFETY REBEL™ SELF RETRACTING LIFELINE
Product Features	Inexpensive to repair, yet incorporates corrosion-resistant stainless steel and aluminum components which results in longer life for the products. Fall Protection. Precision Engineered.

THE ABC'S OF FALL PROTECTION

ANCHORAGE

Anchorage connectors provide a secure point of attachment (to an existing structure) for the fall arrest system. Anchorage connectors can be permanent or temporary and vary to suit the type of structure available.

BODY WEAR

Full body harnesses connect the worker to the fall arrest system. They are specially designed to protect the worker against serious injury in the event of a fall whilst also remaining comfortable to wear.

CONNECTOR

Connectors are devices that connect the full body harness to the anchorage system. They can be single products or multiple devices working together.

FALLTECH® CONTRACTOR LEADING EDGE SRL – 20FT.

The FallTech Contractor LE SRL is designed to provide the highest level of safety when working around unprotected sides and edges including leading edges.

- May be used as a traditional SRD for overhead anchorage options or in below harness D-ring anchorage conditions.
- 7/32" Galvanized steel cable for added cut resistance.
- Dual energy absorber system – internal inertial brake and external shock pack – reduces the risk of cable failure when contacting an edge during a fall event.
- ANSI Z359.13 compliant external energy absorber to reduce impact forces during edge contact in a fall event.
- Certified as ANSI Z359.14 LE.

MILLER® TITAN B-COMPLIANT ROOF KITS

Titan B-Compliant Roof Kits provide a complete fall protection solution for roofing applications. The kits simplify product selection by providing all of the components necessary for fall protection safety and to meet federal OSHA compliance.

- Lightweight, full-body harness with 3-point adjustment - Allows for quick donning and greater mobility, increasing productivity with less worker fatigue.
- Rope grab with permanently attached, 3-ft. lanyard with shock absorber pack - In the event of a fall, the rope grab locks on to the rope reducing force on the worker.
- High-strength, 5/8-in. diameter, polypropylene blend rope lifeline with locking snap hook - Enables quick attachment to roof anchor and provides UV as well as moisture resistance for increased product durability.
- Reusable stainless steel roof anchor bracket with plated D-ring - Corrosion resistant for long service life on the job site.
- Waterproof storage container - Convenient storage container that protects equipment when in storage for a long service life.

Hanes Supply Fall Protection Seminars are hands-on demonstrations for a wide range of industrial and contractor applications. Our safety specialists are available to conduct fall protection seminars at your facility, or you can take advantage of our fully equipped facilities. Additionally, we can customize our seminars to address your specific needs. Call our Safety Sales Manager, Mark Arcuri at 716.374.4482 to schedule a seminar at your convenience.

TOPICS INCLUDE:

- ABC's of Fall Protection
- Confined Space
- Hands-On Demo of Durahoist Davit Arm System
- Lanyards VS Retractable
- Fall Clearance Heights
- Fall Arrest Forces in a Fall Situation
- Relief Straps
- Inspection of Fall Protection Products
- Fitting of Harnesses
- 100% Tie-Off Applications
- Horizontal Lifeline Applications
- Demo of New Fall Protection Products
