## WHY DO YOU NEED A SAFETY CAN?

Almost every place of business has occasion to use flammable liquids such as fuels, chemicals, and solvents. Whereas these liquids are relatively commonplace, it's important to understand the dangers they may present. For example, one gallon of vaporized gasoline can explode with the same force as twenty sticks of dynamite. Safety containers protect workers by minimizing the risk of accidents and fires when handling hazardous liquids.

# HARRINGTON

A KITO GROUP COMPANY

## CF HAND CHAIN HOIST

Harrington's CF hand chain hoists were designed for portability and durability. These hoists are the economical and practical choice for efficient, trouble-free service. The CF model is a long-lasting construction grade hoist that offers the best value in a hand chain hoist.

- Grade 100 heat-treated manganese alloy load chain resists abrasion and wear while minimizing chain weight.
- Forged and heat-treated alloy steel hooks are designed to open slowly and not fracture under excessive loads.
- Factory load tested to 125% of rated capacity, in accordance with ASME B30.16 requirements.

ITEM NO.	DESCRIPTION	PRICE
HOI70165 CF005-10	1/2 Ton, 10' Lift	\$289.46

HOI70247 CB100-20	10 Ton, 20' Lift	\$5,331.86

## LB LEVER HOIST

Harrington's LB lever hoists combine easy operation with a compact, low headroom design that easily handles real-world demands. They can be used horizontally, vertically, inverted or at any other load angle and have the strength to get the job done.

- Features a compact design, perfect for use in tight quarters or where headroom is a problem.
- Every LB is tested to 125% of capacity and supplied with a test certificate.
- 360° handle rotation for fast operation.
- Short 15" recovery stroke for operation in close quarters.

## VFD ELECTRIC HOISTS

The SEQ and EQ Hoists includes a unique no-load high-speed function that automatically increase hoist speed up to 130% when the load is less than 30% of working load limit. Add an MRQ motorized (with EQ only), PT push or GT geared trolleys (all models) when beam travel is needed.

### SEQ SINGLE PHASE

DUAL SPEE VFD, 1-PHASE electric chain hoist with re-connectable 115/230V power. Our SEQ hoist is a true REVOLUTION in SINGLE PHASE lifting!

- 1-Phase voltage 115-1-60/ (220-230)-1-50/60 (reconnectable)

### EQ THREE PHASE

Designed for medium to heavy-duty industrial and workstation applications.

- 3-Phas voltage 208-230V-3-50/60 OR 380-460V-3-50/60

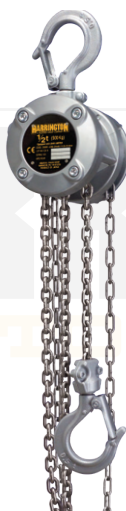

CONTACT YOUR HSI REPRESENTATIVE FOR PRICING AND AVAILABILITY.

## CX MINI HAND CHAIN HOIST

Harrington's CX hoists are notably the world's smallest hand chain hoists. Their light weight and extremely compact design make them ideal tools for high or difficult to reach places. Features include a metal chain guide for durability and smooth operation, grade 100 nickel-plated load chain and strong hook latches with a safety tip.

- Capacity 1/4 and 1/2 Ton
- Compact, low headroom design for use anywhere
- Very low force is required to lift loads
- Effortless to transport, install and store
- Load limiter prevents lifting dangerous loads over rated capacity
- Aluminum body with steel frame provides superior strength

### Advanced Design Overload Limiter

The CX comes standard with an advanced design load limiter that prevents the hoist from being used to lift damaging loads beyond rated capacity.

### Completely Sealed Gears and Brake

Completely sealed brake and gearing give you added protection against damage from dust and water which makes maintenance simple and keeps your hoist performing longer.

## EFFICIENT & ERGONOMIC LOAD SECUREMENT TECHNOLOGY

Speedbinders is changing the load binder industry with patented Torque Drive technology. Our line of products provide considerable time savings and enhanced safety benefits for drivers by eliminating repetitive, straining operations. Torque Drive binders are revolutionizing load securement. By adopting the practice of using portable power drill to secure loads and pull the chain tight, you can alleviate shoulder strain, reduce injuries, and allow for easier operation and reduced operation time.

### CROSBY® TORQUE DRIVE SPEEDBINDER

- Enhanced safety features
- More ergonomic
- Quicker tie-down & release times
- Longer lasting
- Highest tension
- Easy to operate in tight spots
- Unmatched tension retention
- Tamper-resistant

### CROSBY® TURNBUCKLES

- Hot dip galvanized steel
- End fittings are quenched and tempered,
- Bodies heat treated by normalizing
- Turnbuckle eyes are forged elongated, by design, to maximize easy attachment in system and minimize stress in the eye. For turnbuckle sizes 1/4" through 2-1/2", a shackle one size smaller can be reeved through eye.
- Turnbuckle hooks are forged with a greater cross sectional area that results in a stronger hook with better fatigue properties
- Turnbuckles recommended for straight or in-line pull only

## VAN BEEST GREEN PIN® CATCH SHACKLE BN

- Prevents accidental dropping of shackle components
- All components can be tethered
- Reduces number of injuries and deaths
- For all types of tethering methods
- Co-developed with DROPS-organization
- CAD DRAWING

The Green Pin® Catch shackle BN prevents the accidental dropping of shackle bolts, nuts, cotter pins and even complete shackles, thereby preventing injuries or deaths. These innovative shackles have an attachment point on each individual component to connect them to a lanyard. The lanyards can then be securely fastened to something or someone, for example to a tool-belt that the rigger is wearing. Also, ease of use is guaranteed: the disc on the nut that enables tethering rotates independently from the nut itself, thereby not coiling the attached lanyard.

# NYLON

## TYPE 1 (TC) NYLON TRIANGLE SLINGS

Slings have a triangle and choker fitting on either end. This is most commonly used in a choker hitch, but can also be used in basket and vertical hitches.

## TYPE 2 (TC) NYLON TRIANGLE SLINGS

Slings have a triangle fitting on each end. Type 2 slings are more economical than Type 1. They are normally used in a basket hitch, can be used in a vertical hitch, but they cannot be used in a choker hitch.

## TYPE 3 (EE) EYE AND EYE NYLON SLINGS

Flat Eye slings are very popular slings that can be used in all three types of hitches. They are easy to remove from beneath the load after the load is in place. Unless Type 4 is requested, Type 3 will be supplied as the standard EE sling.

## TYPE 4 (EE) TWISTED EYE AND EYE NYLON SLINGS

Twisted Eye slings are similar to Type 3 except the eyes are turned 90 degrees to form a better choker hitch. This type of eye also nests together better when used in a basket hitch.

## TYPE 5 (EN) ENDLESS NYLON SLINGS

Endless slings are very economical. They can be used in all three types of hitches and wear points can be moved to increase sling life. The sling legs can be spread for improved load balance.

## TYPE 6 (RE) REVERSED EYE NYLON SLINGS WITH CORDURA WEAR PADS

Reversed Eye slings have protective webbing over the entire body and eyes. This extra webbing reinforces the sling and protects it from wear, resulting in an exceptionally resilient sling.

## ATTACHED EYE WIDE-LIFT SLINGS FOR LIGHT, BULKY LOADS

Attached eye wide-lift slings are ideal for lifts that require wider bearing areas and some balance attributes. Eyes are made from separate material- WLA1 is 1-ply, WLA2 is 2-ply- both sewn to the sling body. Body is single ply for both 1 and 2-ply eyes.

## CONTINUOUS EYE WIDE-LIFT SLINGS FOR HEAVY LOADS

Continuous eye wide-lift slings are constructed from one endless sling with the two body lengths butted and joined side-by-side. Stiffener webbing is used at the base of the eyes to deter the body webbing from folding down the middle.

## NYLON BRIDLE SLINGS

Nylon bridles can be configured with varied leg lengths for the purpose of simultaneously lifting several tool bags up to the work area. Contact your HSI sales representative for a made-to-order customized solution for your lifting needs.

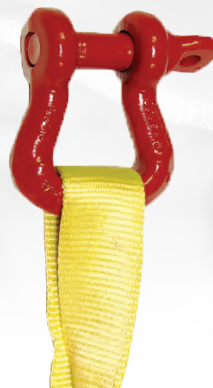

## NYLON MONSTER EDGE SLINGS

Monster Edge nylon slings are produced with a stiffer material that adds reinforcement and durability to the sling's edges. Available in widths of 1" - 4" and 6".

## Crosby® Sling Saver Shackles

- Designed with non-slip surface that eliminates bunching effect caused by traditional shackles, reducing sling tendency to slide.
- Increased radius of bow gives wider sling bearing surface resulting in an increased area for load distribution.
- Increases synthetic sling efficiency by at least 15% as compared to standard anchor and chain shackle bows and conventional hooks. This allows 100% of the slings rated Working Load Limit to be achieved.
- Allows better load distribution of internal fibers.
- All alloy construction. Design factor of 5 to 1.

Can be used with nylon, polyester and Twin-Path®

# TWIN-PATH®

## WEIGHS 90% LESS THAN A STEEL

- A** Twin-Path® Slings are two separate paths working together as one sling.
- B** High performance fibers known as (K-Spec) have less than 1% elongation at rated capacity with a high resistance to chemicals, heat and moisture.
- C** Covermax outer cover is 4x more abrasion resistant than polyester outer covers.
- D** Our Armor Wear Pads are removable using Velcro or can be sewn directly over sling
- E** Safety inner sleeve acts as an early warning device when the outer sleeve is cut or worn.
- F** Check-Fast® External Warning Indicator provides a quick way of checking the condition of the sling.

## TWIN-PATH® EQUILIZER BLOCK

The Equalizer Block is used to maintain tension on all legs of the sling during a lift. Rather than adjusting slings and hooks prior to completing a lift, the Equalizer Block automatically adjusts itself when the load is put on the device from the sling. This product was designed specifically for Twin-Path® slings and is the only rolling block for synthetic roundslings.

# HOW TO ORDER SLINGS

## NYLON SLINGS

- 1 Pick sling material
- 2 Find your sling type and code number
- 3 Number of Piles - Number of piles refers to the thickness of the webbing in Buffalo Web slings
- 4 Type of Webbing - Buffalo Sling handles a light duty (#6) and heavy-duty line of webbing (#8)
- 5 Figure put your web width
- 6 Sling Length - Web slings can be made to virtually any length

### SLING TYPES

**1[TC]** Slings have a triangle and choker fitting on either end

**2[TT]** Slings have a triangle fitting on each end

**3[EE]** Flat eye slings can be used in all three types of hitches

**4[EE]** Twisted eye sling, eyes are turned 90° forming better choker hitch

**5[EN]** Endless slings, legs can be spread for improved load balance

**6[RE]** Reversed eye slings have protective webbing over the entire body and eyes

**How To Order:** Sling Part No \_\_\_\_\_ Length \_\_\_\_\_ Type \_\_\_\_\_

**Example:** Sling Part No **EE2-802** Length **10'** Type **3**

**NOTE:** Measurement of Length does not include the ring

## WIRE ROPE SLINGS

- 1 Determine the weight and configuration of the load(s) to be lifted.
- 2 Determine the size of the body chain according to the working load limits. Be sure to take into consideration the effect of the required angle. Working Load Limit: the working load limit is the maximum load in pounds which should ever be applied to chain, even when chain is new, and when load is uniformly applied in direct tension to a straight length of chain.
- 3 Determine the reach required to give the desired angle. The reach is measured from the lower bearing surface of the master link to the bearing surface of the lower attachment. If chain slings are to be used in pairs and are to be matched for reach, please indicate when ordering.
- 4 Be sure to specify type, size and reach when ordering chain slings. **Note: Angle to the load on multiple leg slings will be 60° or greater as long as the distance between lifting eyes of load is NOT greater than reach shown on Identification tag.**

### SLING STYLE

**FL** Oblong link with heavy duty thimbles on top and flemish loops on bottom

**HT** Oblong link with heavy duty thimbles on top and bottom

**EH** Oblong link with heavy duty thimbles on top and eye hoist hooks. Safety latches on bottom

**SPA** Oblong link with heavy duty thimbles on top and screw pin anchor shackle on bottom

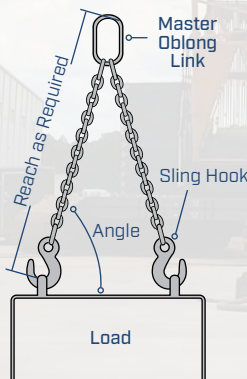

**HOW TO ORDER:** Type \_\_\_\_\_ Code \_\_\_\_\_ Cable Size \_\_\_\_\_ Length \_\_\_\_\_

**EXAMPLE:** Type **200** Code **HT** Cable Size **1/2"** Length **10'**

## CHAIN SLINGS

- 1 Determine the weight and configuration of the load(s) to be lifted. Choose the proper type of chain sling (single, double, etc.) which the size, shape and weight of the load dictate.
- 2 Estimate the approximate angle to the load in which the legs of the sling will be positioned for operation. Refer to the Working Load Limit Chart and to your pre-determined angle of the type sling you have
- 3 Determine the overall reach from bearing point on master link to bearing point on attachment. Choose the chain size that meets your requirements.
- 4 When entering your order be sure you give complete information as to the size, reach and attachments required.

**How To Order:** Type \_\_\_\_\_ Master Link \_\_\_\_\_ Hooks \_\_\_\_\_ Chain Size \_\_\_\_\_ Reach \_\_\_\_\_

**Example:** Type **D** Master Link **O** Hooks **S** Chain Size **3/8"** Reach **10"**

# HANES SUPPLY SERVICES AND CUSTOMIZED TRAINING PROGRAMS

## RIGGING TRAINING

Rigger training courses are designed to teach competent rigging skills and safe rigging practices as per ASME B30, OSHA 1910 and OSHA 1926 standards. A variety of course levels are available, ranging from rigging basics to advanced load control and load calculation.

TRAINING SESSIONS AVAILABLE AT YOUR FACILITY OR OUR TRAINING CENTER:

- Basic / Introductory Rigging Courses - 4 hours
- Rigging Equipment Inspector Training - 8 hours
- Advanced Rigger Course - 8 hours  
(Load Control & Calculation)
- Signal Person Training - 1.5 hours
- Rigging Fundamentals- 4 hours
- Chain Hoist Technician - 2 Days
- Overhead Crane Operator Safety Course - 8 hours

\*Customizable training courses available to meet your specific needs.

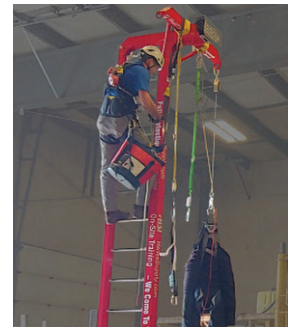

## SAFETY TRAINING

Safety specialists are available to conduct comprehensive training seminars at your facility. Topics include fall protection, proper tool use, OSHA standards and more. Ask about our fully equipped **Fall Protection Demo Trailer** for live demos of fall protection systems in action.

TRAINING SESSIONS AVAILABLE AT YOUR FACILITY OR OUR TRAINING CENTER:

- Fall Protection Safety Seminars
- Power Tool & Hand Tool Application Training
- Ladder Safety Workshop
- Respirators Safety Equipment Training
- Fire Stop Materials Application Classes
- Hydraulic Rams, Pumps & Pullers Safety Course

## TOOL AND EQUIPMENT RENTALS

Our rental department offers a comprehensive inventory of tools and equipment from top manufacturers. Whether your tools are down or you're simply looking to try a product out before committing to buying, we have you covered.

AVAILABLE FOR RENT ON A DAILY, WEEKLY OR MONTHLY BASIS:

- Air Compressors
- Air Tools
- Core Drilling Equipment
- Core Bits
- Confined Space Equipment
- Electric Power Tools
- Generators & Pumps
- Hand Tools
- Hoists, Pullers & Winches
- Hydraulic Tools
- Material Handling Equipment
- Pipe Tools
- Pressure Washers
- Saws
- Tuggers

## REPAIR SERVICES

Hanes Supply is an authorized warranty center with factory authorized/certified technicians. Quality workmanship and great customer service are our top priorities! We can service and repair electric tools, hydraulic and pneumatic tools, hoists, winches, small engines, slings and more!

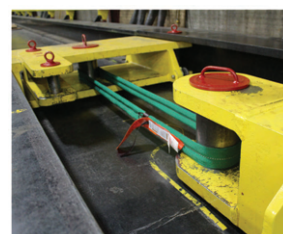

WE REPAIR AND SERVICE THE FOLLOWING EQUIPMENT:

- Slings
- Wire Rope Assemblies
- Hydraulic Tools
- Pneumatic Tools
- Electric Tools
- Winches and Hoists
- Small Engines
- Pipe Threaders
- Magnetic Drill Bits (Re-sharpening services)

## CUSTOM SLING FABRICATION

With over 88 years of manufacturing experience, Hanes Supply will develop lifting solutions for your most challenging requirements. Our slings are proudly made in the USA under a strict quality management system reflected in our ISO 9001:2015 registered status. Hanes Supply is an official SlingMax® dealer and distributor of Crosby®, CM®, Campbell®, Skookum®, Van Beest® and Actek®.

- SlingMax® Twin-Path® Slings
- Nylon Web Slings
- Polyester Round Slings
- Reversed Eye Slings
- Cordura-Web Nylon Slings
- Continuous or Attached Eye Wide-Lift Slings
- Chain Slings
- Wire Rope Loop-Lock Splices

## INSPECTIONS

Our trained and experienced rigging and fall protection experts offer inspection services for all of your wire rope, chain, synthetic slings, rigging hardware and fall protection gear. Our inspection teams provide written records of our inspections in according with ASME B30.9 (Slings), B30.16 (Overhead Hoists), B30.21 (Manual Lever Operated Hoists), and B30.26 (Hardware), OSHA 1926, OSHA 1910 and Manufacturers' Recommendations.

INSPECTIONS AVAILABLE: INCLUDING ON-SITE EXAMINATIONS:

- Sling Inspections: Wire Rope, Chain, Nylon, Polyester Round, Twin Path
- Crane Hoists: Wire Rope Inspections
- Chain Hoists, Chain Pullers, Wire Rope Pullers: Repairs, Inspections, Load Testing
- Rigging Hardware, Lifting Clamps, Crane Blocks
- Fall Protection Equipment: Harnesses, Lanyards, Retractable Lifelines
- Proof Testing and Certification
- Magnetic Particle Inspection and Certification
